Professional Summary

Full Stack Developer specializing in **MERN stack development**, with hands-on experience building React.js and Node.js applications using MongoDB and REST APIs. Built and deployed **InterviewAI**, an AI-powered interview platform integrating Google Gemini API, JWT authentication, and ATS-focused features.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication,

Database: MongoDB, Mongoose

AI: Google Gemini API, Generative AI

Tools & CS Fundamentals: Git, GitHub, Postman, Data Structures & Algorithms

Professional Experience

Full Stack Developer Intern — XCoders IT Solutions *Jan 2025 – Aug 2025*

- Worked on MERN stack applications, developing React.js interfaces, Express.js REST APIs, and MongoDB schemas for application features.
- Implemented JWT authentication and CRUD operations, integrating React forms with Express APIs and MongoDB for persistent data management.

Projects

InterviewAI – AI-Powered Interview Preparation Platform *MERN Stack | Google Gemini API*

GitHub | **Live Demo**

- **Built** an **AI-powered interview preparation platform** using the MERN stack and Google Gemini API for technical/behavioral practice, personalized roadmaps, and ATS resume scoring.
- **Developed 12+ REST API endpoints** with JWT authentication and protected routes to manage user authentication and application workflows.
- **Created 10+ reusable React components across 6+ feature pages** and deployed the production application on Vercel with environment-based configuration.

RepairOps – Repair Management System *MERN Stack*

GitHub

- **Developed** 13+ RESTful API endpoints for repair request management, technician assignments, service estimates, and repair status tracking.
- **Implemented** request validation, JWT-based authentication, and protected routes with role-based authorization to secure customer, technician, and administrator operations.
- **Designed** repair lifecycle logic with status-transition validation and approval rules to prevent invalid workflow changes and unauthorized updates.
- **Structured** backend modules with centralized error handling and consistent API responses to handle invalid inputs, access violations, and operational failures.

Personal Portfolio Website *React | JavaScript | Tailwind CSS | Vercel*

GitHub | **Live Demo**

- **Built** a **responsive developer portfolio** using HTML5, CSS3, JavaScript, and Tailwind CSS to showcase projects, technical skills, and experience across mobile, tablet, and desktop layouts.
- **Deployed** the portfolio on **Vercel with GitHub integration**, enabling automated builds and production updates on code commits.

Education

B.Tech in Computer Science & Engineering (Advanced Computing) *2022 – 2026*

SAGE University, Indore **CGPA: 7.05 / 10.0**
